

# UVC DISINFECTION PRODUCTS

## For Medical and Non-Medical Applications

### Why UVSheltron?

Ultraviolet (UV) disinfection has become an incredibly reliable and viable alternative to chemical disinfection methods. This is due to the increased awareness of chemical-resistant microbes and the presence of harmful by-products.

UVC disinfection relies on radiation emitted in the wavelength range of 250 nm to 280 nm (UVC) to inactivate pathogens.

UVSheltron kills the virus and controls the spread of infection.

### Sanitization Services

- Trained in International Sanitary Supply Association (ISSA) and Cleaning Management of Institute (CMI) processes
- Trained for recommended monitoring and inspection procedures, proper labeling, dilution, Personal Protective Equipment (PPE), restocking supplies in appropriate storage procedures.

### COVID-19 Disinfection & Decontamination

- Trained staff disinfects and decontaminates as per the current CDC COVID-19 guidelines
- Front-line custodians provide Healthy High-Performance Cleaning (HHPC), inhibiting the spread of communicable diseases while transferring individuals.
- Utilize Biosafety level 4 PPE (masks, face shield and gown)

**UBT**  
responding to the  
COVID-19  
World Health Crisis

**ARK**

Use to effectively disinfect wheelchairs, small and large portable equipment; Can be placed in hospitals, schools, military facilities, households, or any open space.

**Illuminant**

Illuminant 6 and Illuminant 3  
An effective environmental-friendly and chemical free room and area decontamination apparatus that can be used in hospitals, airports, offices, schools, households, or any space requiring disinfection. Illuminant is equipped with motion detectors that automatically turnoff the unit to prevent unsafe exposure.

**Irrupt2**

Quickly and safely use to decontaminate masks, stethoscopes, eyeglasses, PPEs, medical and non-medical devices; and cars, buses, airplanes, or other methods of transportation where space is tight. Available with or without tilt switch sensor.

**Elide**

Use to effectively disinfect masks, all PPEs, face shields, goggles, stethoscopes, thermometers, jewelry, watches, smartphones, tablets, badges, eyeglasses, other medical and non-medical devices quickly and safely.

**Chamber**

Use to effectively disinfect masks, caps, small and large PPEs, face shields, goggles, head covering, shoe covers, stethoscopes, thermometers, nebulizers, respirators, lab coats, smartphones, tablets, badges, medical and other non-medical devices. Can be placed in hospitals, schools, military facilities, households, or any open space.

**COMING SOON: BOT**

Remotely send the mobile Bot to disinfect hospitals, offices, schools, households, or any open space. Equipped with software and sensor-based emergency stop. UVSheltron Bot is a user-friendly option to conduct a fast and efficient decontamination process. Perfect for spaces with obstacles that might require repositioning of the unit.
