

Developed by UBT, **CERTA** is a unique and cost-effective solution for competitive corporations to increase their productivity while reducing time, cost, and overhead. Successfully tested and implemented in multiple markets, **CERTA** stands for the following core principles:

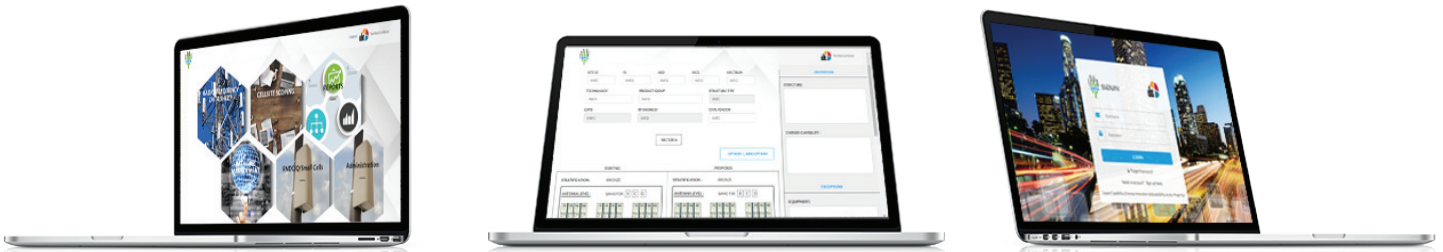

Competent: it performs with the same skill set as a group of expert engineers

Efficient: faster data transformation

Reliable: a result-oriented software designed by industry subject matter experts

Tangible: improved productivity, reduced costs

Adaptive: easy customization based on customer requirements

CERTA offers multiple functionalities, including but not limited to:

- Radio Frequency Data Sheet (RFDS) processes in half the time methods being used today
- Plumbing diagram creation for a cell site
- RF scoping FORM for new site builds and carrier adds
- Baseband and carrier limitations recommendations in scoping form
